How to Download Installation Files Needed for Installation of Hydrocarbon Expert 5

DESCRIPTION

The installation package is very large. In order to optimize downloading, the installation image has been divided into several files call Web Media Blocks (WMB). The WMB have extension 7zip. If the computer where the HCE5 will be installed has access to the Internet, then the installation procedure will automatically download the needed WMB files. However, if the computer does not have access to the internet, all of the needed WMB files need to be in the same location with the "setup.exe" program.

PROCEDURE

- 1- Go to www.separationsystems.com
- 2- Click on Support
- 3- Click on Software
- 4- Click on Hydrocarbon Expert
- 5- Click on Version 5
- 6- Download the latest revision.
- 7- Unzip the executable.
- 8- Go to <http://www.separationsystems.com/public/hce/v5/>
- 9- Download the following files:
 - a- ms.7zip
 - b- tutorials.7zip
- 10- Go to <http://www.separationsystems.com/public/microsoft/>
- 11- Download the following files:
 - a- microsoft access.7zip
 - b- microsoft windows installer 2.0.7zip

Note: depending on the internet browser, the following steps may be needed in order to download files with extension 7zip:

- A. Right-click on each file and select "Save Target As".
- B. On the window that will be displayed to name the file, please use the exact same name as listed. For example, if you select "ms.7zip" the Explorer will default to "ms.htm". Just force it to "ms.7zip"

- 12- Copy all of the files with extension **7zip** and the **setup.exe** into a CD. This will create an image of the installation CD that we ship.
